

# Clinical Verification of Homeopathy

Michel Van Wassenhoven

Coordinator Research Sub-committee ECH and LMHI  
International Scientific Committee on Homeopathic Investigations

## ABSTRACT

The world is changing! This is certainly true regarding the homeopathic practice and access to homeopathic medicine. Therefore our first priority at the ECH-LMHI [1] has been to produce a yearly report on the scientific framework of homeopathy. In the 2010 version a new chapter about epidemic diseases has been added including the Leptospirosis survey on the Cuban population. A second priority has been to review the definition of the homeopathic medicines respecting the new framework generated by the official registration procedure and the WHO report. We are working now on a documented (Materia Medica and provings) list of homeopathic remedies to facilitate the registration of our remedies.

The new challenges are: first of all more good research proposals and as such more funding (possible through ISCHI + Blackie Foundation as examples) [2]; international acceptance of new guidelines for proving and clinical verification of homeopathic symptoms (Proposals are ready for discussion); total reconsideration of the homeopathic repertories including results of the clinical verification of the symptoms.

The world is changing, we are part of the world and changes are needed also for homeopathy!
